Currently Digital Age promotes existing patterns of gender inequality

- ▶ Leaving girls and women behind as a result of the Gender Digital Divide
- ▶ Need for inclusive and transformative technology and digital education is critical for sustained future

International Women's Day 2023 aims to recognize and celebrate the women and girls who are championing the advancement of "Transformative technology and digital education" and also to explore the impact of the digital gender gap on widening economic and social inequalities including on importance of protecting the rights of women and girls in digital spaces and addressing online and ICT- facilitated gender-based violence.

A future where:
